

IMPORTANT NOTICE: Water Rate Adjustment – Oct 2026

In October 2025, the Grafton Water District Commissioners approved a series of four quarterly 10% water rate increases, beginning with the January 2026 billing cycle. October 2026 billing cycle is the fourth of these four.

The Fourth 10% rate increase will take effect with the October 2026 billing. These increases are necessary to begin funding design and permitting expenses related to PFAS treatment as we continue addressing long-term water quality and regulatory requirements. We appreciate your continued understanding and support as we work to improve the reliability of Grafton's Water Supply.
